

# Pill SCADAwise BOX

## Features

### Secure

- Unobtrusive profile reduces interest from vandals
- Articulated mast support flange locks in place and prevents lowering while the lid is closed.
- The Pillbox lid has a protective cowl that prevents bolt cutters from cutting the lock.
- 20ft mast length keeps panels and antennas safely out of reach.

### Easy to Install

- No forms or rebar required.
- Installs in 3' sq. excavation & concrete back-fill.
- Final assembly of the complete Pillbox can be accomplished in minutes using hand tools.
- Integral winches can raise & lower both mast and battery housing to convenient working heights.

### Easy to Maintain

- Innovative construction protects batteries from ambient temperature extremes by placing them underground. Battery life can double with each 10° reduction towards room temperature. \*(consult your manufacturer)
- The Pillbox body, panel, and cage are all powder-coated for corrosion resistance.
- Quick-connect harnesses allow easy equipment replacement.
- Panel and components raise for easy replacement access, or can be serviced while powered.

## Easy to Service

- Back panel can be raised to multiple locking positions.
- Raised panel provides easy access to DIN-mounted components.
- Back panel and components can remain powered while raised.
- Panel can be raised for access to quick-connect plugs, signal quick-connect plugs, and antenna leader cable.
- Panel can slide out completely, cage can be removed completely.
- Battery cage elevates to convenient working height via integral winch.
- Mast can be lowered via integral winch, placing solar panel and antenna at convenient working height.
- Open lid acts as stable surface for laptops or field equipment to prevent damage or loss.

## Engineered Solution

- Specially designed for quick installation in remote locations where space is limited or vandalism risk is elevated.
- Made, designed, and supported in the United States.
- Panel supports many industry standard DIN rail mounted devices
